

TOP 10

Questions to Ask When Hiring an IT Security Consultant:

- 1 What relevant IT security experience do you have?
- 2 What is my organization's biggest security risk?
- 3 Who's going to perform the actual work?
- 4 How will you communicate with me about the work you do?
- 5 What will you need from my company to get the job done?
- 6 Are you going to provide training for my employees?
- 7 What do you consider the top 3 Cybersecurity threats facing businesses today?
- 8 What are you doing to stay informed of cyber-threats in today's world?
- 9 Why does my business need additional IT security consulting?
- 10 What makes your practice different?
